

## Setup:

On machine A and B runs openswan (2.6.29).  
I need to run netkey on both machines (and not KLIPS)

### On machine A:

eth0 has 1.1.1.6 on eth0; connected directly to machine B (via eth1 of machine B).

Can ping to 1.1.1.196

### On machine B:

- eth1 has 1.1.1.196 ; connected directly to machine A via eth0 of machine A;

able to ping 1.1.1.6 before starting ipsec service.

- eth0 has 192.168.1.196 ; connected directly to Machine C via eth1 of Machine C ; able to ping 192.168.1.197.

### On machine C:

192.168.1.197 on eth1. Connected directly to machine B and can ping 192.168.1.196.
